- Sustainable Flooring
- Cost Saving- you are using your existing slab on grade
- Unlimited Floor Options
- Low Maintenance

CONCRETE COLORS & STAINS

Is color right for your project? We can create on site mock ups. Whether it's Acid stains or Water based. Let us help you bring your vision to life.

GRIND & SEAL

We offer many options including grind & seal . Grinding of the top surface of the concrete with metal bond diamonds. The higher the grit the less visible scratches.

Robles Construction created a beautiful yard for me! They did a great job, finished BEFORE the time Kim initially stated AND ALSO FINISHED UNDER PROJECTED COSTS!! What construction company has EVER done those two things for you? — Glenda M.

Kim and her crew did a fantastic job on an old concrete slab in my 1930s house. Grinding and polishing those floors is not easy, and now it looks just beautiful — with the quality and interest of the original patina - a feature instead of the eye-sore it was! Kim is just great, really knows her craft, ia a good communicator, and quick to respond. — Albert A.

Kim is a great professional who offers high quality work. I highly recommend her for any of your concrete needs. — Fatemah N.

KIMBERLEY ROBLES

Robles Concrete Design is a women-owned and run decorative concrete company. I started in concrete as a union-trained apprentice on the Oakland Federal Building in 1994. Throughout my career I have worked for various union contractors on projects throughout the bay area. I have learned different techniques from some of the top industry artisans. I have a certificate in estimating and project management, and have worked as an estimator & project manager.
